Karthikeyan Rajendran
Front End Developer

I'm a front-end engineer with 6+ years of experience developing UI/UX interfaces for cloud products. My passion developing for the front-end started early in college and I've been flirting with tech ranging from jQuery to Vue since then. I like wearing different hats. I have experience building, growing, and managing a front-end team in my career working with startups.

EXPERIENCE

Positivenaick Analytics, Chennai - Full Stack Developer
Jan 2018 - PRESENT | 2 Years 4 Months

HIGHLIGHTS

- Developed an end to end SaaS product named yekaliva.ai, an AI-based chatbot platform. I kind of wore a full-stack hat for this project using NodeJS to handle the backend. My focus was, however, to flesh out a great UI/UX for the product.

- Built and maintained an enterprise social automation product named Socially, a tool that collects hashtags from social media and gives insights using drilled down word clouds and sentiments

- I ended up managing / mentoring a team of 8 engineers.

- I was responsible for maintaining the complete AWS infrastructure for the organization and docker based production deployments.

- Creating the product involved iterating on multiple versions and I came up with improved UI for every new version.

TECHNOLOGIES

Javascript, Vue, Angular 1, NodeJs, MongoDB, Docker, HTML, LESS AWS, Rabbitmq

LEARNINGS

Though I had previous startup experience, working here I got to face the highs and lows of starting a company from nothing to something. I was one of the key founding members of the organization. I got rich experience working for deadlines, quick decision making, commitments, and rapid agile development.

Roanuz, Chennai - Front End Developer
Jul 2015 - Jan 2018 | 2 Years 6 Months

HIGHLIGHTS

- Developed the front-end for Baseflow: A Practo alternative for dentists. The most challenging task was creating a Google Calendar-like interface for doctors to manage appointments and schedules.

- Built the front end for an enterprise chatbot platform.

SKILLS

Javascript
Vue
JQuery
AngularJS
HTML / LESS / CSS
NodeJS/ Express
MongoDB / Mongoose

FAMILIAR WITH

GitLab / GitHub
Adobe Photohop
Figma
Docker
AWS

EXPERTISE

Product Development
Good sense of Design
Web Usability
UI Development
UI Research
Product Managment
Product Growth

PERSONAL PROJECTS

Around.me - A location proximity based social network. Based on an idea I had over the Covid-19 quarantine period.

Gossip - Anonymous posts & polls creation platform. Based on an idea I had while working on feeds app.

Soflimy- What if IMDB & Youtube married and had a child?

MovieTime - My small take on re-thinking herotalkies.com with the ability to control playback via phones.

- Worked on the UI experience of a football training app. The app was for trainers to create training chapters using an easy drag and drop interface for their students.

- Was responsible for maintaining the company's and product's websites.

TECHNOLOGIES

VueJs, Anuglar 2, Angular 1, TypeScript, JQuery, HTML. LESS, Python NodeJS

LEARNINGS

I got over the fear of new technologies. I learnt how to attack the problem with the best tool instead of just sticking to the most familiar. Learned about leadership, deadlines and commitments. Also, here's where my love for building SPAs started.

Nextwave Multimedia, Chennai - Web Developer

Jan 2014 - March 2015 | 1 Years 3 Months

HIGHLIGHTS

- Worked on building an administrative interface for the beta product launch.

- Worked on tweaking the UI for a small web app for the company's client.

- I was responsible for revamping the 12 year-old-company-website to a more modern, responsive website.

TECHNOLOGIES

HTML5, CSS3, Javascript, JQuery, PHP, Angular 1

EDUCATION

B.Tech Information Technology, Anna University, S.M.K Fomra Institute of Technology, Chennai

April 2009 - April 2013

HSLC, St.Mary's Anglo Indian Hr. Sec. School, Chennai

March 2008 - March 2009

SSLC, St.Mary's Anglo Indian Hr. Sec. School, Chennai

March 2006 - March 2007
